Thank you for your concern, Mr. Englander.  
I'm forwarding your message to Jason Brush, the current supervisor of EPA's Regional Wetlands Office.  
Best Regards, Tim

Subject: redwood city area salt ponds

Dear Mr Vendlinski

I recently heard that Cargill was planning to convert some salt ponds in the Redwood city area to other commercial use.

I hope that if these ponds are converted to anything, they will be allowed to go back to being wetlands.

As you undoubtedly know, our SF Bay Wetlands are shrinking and are more essential every year that the Sea level is rising, not just to the migrating water fowl but to those of us who are lucky to live in the SF Bay area.

Please consider this as a citizen scientist request to restore as much of our wetlands as feasible. Our children and grandchildren will thanks us.

Jeff Englander
